Subject: Directive 2014/68 / EU (PED) - "Pressure equipment." **DECLARATION**

Following the analysis of the conditions of applicability of Directive 2014/68/EU 97/23/EC, carried out in collaboration with former ASSOFLUID (now Federtec Association) and CETOP, we declare that the products manufactured / marketed by WAIRCOM MBS SpA, present in the General Catalog Ed.2017, and subsequent updating brochures sales program, do NOT fall in the field of application of the directive itself and therefore must not present CE marking for this directive.

The presence of a CE marking will instead be attributable to the mandatory obligation to appropriately mark the products that must comply with some other mandatory European directive for which similar marking is provided (for example: Directive 2014/30/EU - "Electromagnetic compatibility - EMC" or 2014/35/UE - "Low Voltage").

Finally, we remind you that CE marking could also be present on a voluntary basis to declare the compliance of the products with other non-mandatory directives (see ATEX 2014/34/UE - "ATEX"), for which WAIRCOM MBS SpA is able to offer a complete range of products, which present "ad hoc" marking.

Available for any clarification, we take this opportunity to send our best regards.

The legal representative

WAIRCOM-MBS S.p.A.
